

AdTech

European Harmonised Training for Adhesive Bonding Technology

EMPOWERING EU BUSINESSES BY INCREASING AVAILABILITY OF ADHESIVE BONDING TECHNOLOGY QUALIFIED PROFESSIONALS

ABOUT

The AdTech project will create a European Harmonised Training to support the industries that depend on the availability of these professionals to better leverage the technology.

Adhesive usage is growing rapidly in Europe, as it represents a strong competitive advantage for companies and industries able to muster the knowledge, competencies and techniques needed to better leverage it, at a juncture where there is a growing need for EU businesses to become more competitive through talent and innovation.

The project will update three professional profiles - European Adhesive Bonder (EAB), Specialist (EAS) and Engineer (EAE) – to comply with the common European tools (e.g. EQF, and ECVET), in order to promote transparency and qualification transferability.

AdTech will thus contribute to boost the number of professionals capable of working with adhesive bonding and their international mobility, by setting up an industry-based skills network.
